

Math 5
Fall 2013

Name: _____
HW #7: Test Redos (Optional)

HW #7: Test Redos (Optional)

Due at the START of class on Wednesday, Oct. 30. You may redo up to five numbered problems on the test (technically the Extra Credits are not numbered). So if you want to redo #11, you have to redo 11abc (and that counts as one numbered problem). I will re-grade the problems you turn in and give you the average of your test score on that problem with your work on HW#7 on that problem. That is, suppose you had 2/4 on 11a, 0/2 on 11b and 2/2 on 11c. You would redo all three parts, working them out NEATLY so I can see your work and your thought process. Then on the redo, suppose you get a perfect score, so 4/4, 2/2 and 2/2. I will average the +4 you had originally with the +8 you obtained on HW#7 to give you a +6 on problem 11 on the test. So all the points in this HW will go towards your test score (if you want), and that means you will have to re-submit your test with HW#7. You are allowed to consult your notes, previous HWs or any handouts or material included in emails for this course. You are to work ALONE. If you want to ask me some questions, please do so during office hours or make an appt. to see me outside of class.
